Subject: Microsoft Anti Trust

Dear Sir or Madam,

I write to express my sincere concern as to the terms of settlement of the Microsoft Anti Trust case.

I have read the original judgement given in this case and one can only conclude that Microsoft has continually acted in an unethical and unprincipled manner.

Microsoft has deliberately and knowingly used its power to stifle competition, but more importantly has in so prevented good technologies from coming to market or been accepted.

Microsoft is a ruthless and an unfit company, you will be failing in your responsibilities if you do not take the strongest possible action against them.

There is a consensus in the computer industry that Microsoft has used its power to get a very lenient settlement and this leads to a disrespect for the prosecuting authorities.

I encourage you to take more decisive action to ensure that this monology (Microsoft) gets a settlement more befitting their unconsumable behaviour.

Yours truly

Robert Newton
